General Certificate of Secondary Education 2016

GCSE Chemistry

Unit 2

Foundation Tier

GCH21

[GCH21]

WEDNESDAY 22 JUNE, MORNING

TIME

1 hour 30 minutes.

INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces provided at the top of this page.

You must answer the questions in the spaces provided.

Do not write outside the boxed area on each page or on blank pages.

Complete in blue or black ink only. Do not write with a gel pen.

Answer all six questions.

INFORMATION FOR CANDIDATES

The total mark for this paper is 90.

Figures in brackets printed down the right-hand side of pages indicate the marks awarded to each question or part question.

Quality of written communication will be assessed in Question 4(b).

A Data Leaflet, which includes a Periodic Table of the Elements, is included in this question paper.

1 (a) The first national report examining the impact of water fluoridation on children was published in 2014. The dental health of five year olds and twelve year olds living in fluoridated water and non-fluoridated water areas was measured.

Data from this report is shown in the table below.

	In fluoridated water areas	In non-fluoridated water areas
% of twelve year olds with tooth decay	22	37
% of five year olds with tooth decay	13	42
% of hospital admissions for children aged 1–4 for tooth decay	2	20

	_ [2

(b) Four samples of water, A, B, C and D, were tested for hardness. Soap solution was added, with shaking, to each of the four 20.0 cm³ samples of water. The volume of soap solution required to produce 1 cm height of lather was recorded. The experiment was repeated, with fresh boiled samples of water and then again with fresh samples of water which had been treated with washing soda. The results of the experiment are shown below. 20 Volume of soap solution/cm³ 15 10 5 0 -Α В C D Water sample untreated water boiled water water with washing soda added What is meant by the term hard water? _ [1] (ii) Which one of the samples, A, B, C or D is the hardest water? Explain your answer. Sample: _____

ÐE)

)

ÐÐ)

)

)

_ [2]

(iii) What type of hardness is present in the following samples?	
Sample B	
Sample D	[2]
(iv) Explain why hard water is considered to be good for your health.	
	[1]
Water can exist in three different states of matter.	

- (c)
 - The changes of state are represented by the letters A, B, C and D, in the diagram below.

Complete the table below giving the name of the change of state represented by each letter.

Change of state	Name of the change of state
А	
В	
С	
D	

(ii) Name a chemical which could be used to test for the presence of water.
